

# DISTRICT OF 100 Mile House

**FOR IMMEDIATE RELEASE – April 22<sup>nd</sup>, 2025**

## **The District of 100 Mile House Continues Well Redevelopment**

As part of a crucial project to enhance the reliability and sustainability of our water supply, the District of 100 Mile House continues to implement the redevelopment of the three municipal wells. These measures are necessary to ensure that the water infrastructure can continue to operate at optimum capacity and operate effectively.

The well redevelopment project, which began in February was expected to have all three wells completed and in service before the summer peak season. After some complications Well #5 is now complete and is being monitored prior to commencing the redevelopment of Well #4 and Well #6 on May 20<sup>th</sup>. It is in the best interest of the community to ensure that Well #5 is fully operational with no risk of complications before Well #4 and Well #6 are completed.

***The District will be implementing standard watering restrictions as of May 1<sup>st</sup>, 2025.***

**During the next stage of the well redevelopment (May 20<sup>th</sup> – June 7<sup>th</sup>, 2025) the District will implement additional restrictions prohibiting outdoor sprinkling. Hand watering ONLY during this period.**

For further information or questions about the water restrictions and the well redevelopment, please contact the District of 100 Mile House at 250-395-2434 or email [district@100milehouse.com](mailto:district@100milehouse.com). Any changes to the restrictions will be posted on our website at [www.100milehouse.com](http://www.100milehouse.com).

The District of 100 Mile House appreciates the cooperation of all residents during this necessary redevelopment project and looks forward to providing an even more reliable and sustainable water supply in the near future.

“We appreciate the community’s patience, cooperation and efforts towards water conservation during this essential project,” said Maureen Pinkney, Mayor of 100 Mile House. “The goal of the redevelopment is to ensure that our water supply remains reliable, and capable of meeting future demand.”
