

District of 100 Mile House
FIRE ENGINE RFP 2021-05
ADDENDUM #1

8.4.50.38 The windows are to be powered as described in this section

8.4.42 Requesting full roll up doors where possible in order to maximize storage space

8.4.50.22/8.4.43.1.4

Intent is to have even amount of wheel well spare cylinders on each side (i.e. 2 each side or one each side depending on space limitations or interference with equipment such as fuel tanks etc.). Also required is the need for spare cylinder space with the SCBAS in the same cabinet or nearby. In addition, there needs to be a custom weatherproof box to hold another min. 10 spare cylinders up near the dunnage bin or similar area.

8.4.26.3/8.4.50.44

Both the Command Light and Monitor operations will need to be fixed to the pump panel and remotes are no longer required for either

8.4.50.39 The thermal imagers requested are the Scott V320 model

All intakes and discharges shall be free from obstructions and be able to be opened easily while wearing firefighter gloves.

The “additional equipment” shall be included to the overall price with the exception of the monitor and the auto hydraulic hose bed doors. Please submit those costs separately.

END OF ADDENDUM #1 – RFP 2021-05

Roger Hollander
